The global service package for a surgery ("global surgical package") includes the surgery itself and all post-operative care visits rendered during the global surgical period. Beginning on August 11, 2006, we will assign a global surgical period of 30 days for Dental in Nature oral surgery procedures when services are considered by the Aetna Medical plan. As a result, any post operative care including exams, suture removal, and follow up visits will be considered inclusive to the global surgical package.
