

DENTAL AND ORAL SURGERY CLAIM DOCUMENTATION GUIDELINES

Each benefits plan defines which services are covered, excluded and subject to dollar caps or other limits. Members and their dentists will need to refer to the member's benefits plan to determine if any exclusions or other benefit limitations apply*. In addition, coverage may be mandated by applicable state or federal legal requirements.

Unless otherwise noted, all services must be submitted using valid and current Dental Procedures and Nomenclature (CDT®) codes**.

Endodontics		
D3331	Current dated pre-operative radiographs and post-operative radiographs ■ Narrative ▲	Endodontic services may not be covered for teeth exhibiting a poor or questionable prognosis due to advanced periodontal disease, a crown root ratio of less than 50%, poor restorability and/or carious destruction of the clinical crown at or below the osseous crest. Aetna considers BioPure inclusive to the primary endodontic service. Additionally, the use of irrigants (diluted bleach, sterile water, saline, local anesthetic, BioPure – as an alternative to diluted bleach and/or other medicaments to irrigate the canal(s)) are also considered part of the primary endodontic service. CDT code D9630 should not be submitted for benefits for irrigation. D3331: Documentation is required to support the obstruction of 50% or more of the length of the tooth. Mid treatment xrays may be submitted as documentation of the obstruction. D3331 will not be benefited to the same provider that inadvertently causes the obstruction (iatrogenically). D3331 is considered inclusive to retreatment procedures D3346, D3347 and/or D3348.

Periodontal	Based on the American National Standard/American Dental Association Specification No. 1047, Standard Content of an Electronic Periodontal Attachment	
D4210 & D4211	Current dated pre-operative periodontal charting ●	<p>Periodontal services may not be covered for teeth exhibiting a poor or questionable prognosis due to advanced periodontal disease, a crown root ratio of less than 50%, untreated periapical pathology, poor restorability and/or carious destruction of the clinical crown at or below the osseous crest.</p> <p>D4210 & D4211 require 5-8 mm periodontal pocketing to be considered for benefits. D4210 & D4211 are not benefited when submitted with D4341 & D4342 (scaling and root planing) or D4260 & D4261 (osseous surgery) if performed on the same date of service. D4210 & D4211 are considered inclusive to scaling and root planing, a distal wedge (D4274) and frenectomy procedure (D7960). D4211 will not be benefited for removal of hypertrophied tissue around a partially erupted or impacted tooth where the more appropriate code is D7971 – excision of pericoronal gingiva or operculectomy. D4211 is not benefited when the more appropriate code is D4212 (gingivectomy or gingivoplasty to allow access for restorative procedure) or D4230/D4231 (anatomical root exposure).</p> <p>D4249 requires reflection of a full thickness flap and removal of bone, altering the crown to root ratio. Soft tissue ‘crown lengthening’ will not be benefited as D4249. A minimum of four to six weeks is required prior to final preparation/impressions to be considered for benefits.</p> <p>D4260 & D4261 require a comprehensive periodontal charting indicating pocket depths of 5-8 mm. D4260 & D4261 will not be eligible for benefits if a full thickness flap has not been reflected and bone had not been reshaped.</p> <p>D4341 & D4342 require comprehensive periodontal charting indicating pocket depths of 5-8 mm. The presence of root surface calculus, radiographic evidence of bone loss, gingival recession, frenum involvement, furcation defects and bleeding on probing are determinates in addition to the periodontal charting.</p> <p>D4355 will be denied when performed on the same date of service as D0120 (D0145, D0150, D0160 and D0180 will be denied when performed on the same date of service as D4355) (D1110, D1120, D4341, D4342 and D4346 will be denied when performed on the same date of service as D4355)</p>

By Report" procedures		
D2999 D3999 D4999 D5899 D5999 D6199 D6999 D7999 D8999 D9999	Narrative describing specific clinical conditions addressed by the procedure, rationale demonstrating need, pertinent history and treatment plan ▲ Radiographs, if applicable, to assist in describing clinical condition ■	
General Comments		
■	QUALITY OF RADIOGRAPHS: All radiographic images should be of diagnostic quality, depicting appropriate structures, dated, mounted, and labeled right and left. Submitted radiographs should be duplicates and less than 36 months old and labeled with the patient's name and the provider's name and address. DO NOT SEND ORIGINAL RADIOGRAPHS SINCE THEY WILL NOT BE RETURNED. ELECTRONIC IMAGES OF THE RADIOGRAPHS WILL BE RETAINED BY AETNA.	
●	PERIODONTAL CHARTING: Must be comprehensive full mouth, legible, dated, documented with probing depths (up to six per	

	tooth), recorded in mm. per tooth, labeled right and left, mandibular and maxillary, with classified furcation defects and tooth mobility recorded as 1 st , 2 nd or 3 rd degree. May also include gingival margins, the amount of keratinized tissue, and amount of remaining attached gingiva and level of recession.	
▲	WRITTEN NARRATIVES: Must be clear, legible and provide rationale for the proposed treatment. Example: describes specific clinical conditions addressed by the procedure.	
	These guidelines represent frequently submitted procedures which require attachments and are not all inclusive. There may be other dental procedures not listed which require additional documentation. Submit only a completed claim for routine dental procedures such as cleanings and minor restorations, unless otherwise requested.
